

Data and Insight/BI Developer

i-nexus is an AIM listed strategy execution software provider to organizations across the world.

With an ever-growing customer base, this is a fantastic opportunity to be part of a company with the heart and soul of a start-up, but the ambition and path to something exciting.

You should be smart, dynamic, and independent thinking person with at least 3 to 5 years of SaaS experience in a similar role, with a goal of delighting every i-nexus user.

In this critical role you will be part of the Data and Insight team, working closely with the implementation team to develop reports, dashboards and data views to support our clients' strategic programs and objectives.

We are looking for experienced candidates with an ability to tackle complex MySQL reports; an interest in branching out into new dashboard tools and technologies; and a keen interest in data presentation and data visualisation best practice. A willingness to help our specialist integration team out with SQL based integration work would also be a plus.

You will be working within our G2 award winning Success team, based in the central Midlands but fully remote.

Ideally, you are someone who:

- Has proven experience as a BI Developer with a SaaS background
- Minimum of 3 years commercial experience developing reports or analytics experience using Business Intelligence tools including Power BI, Qlik, Tableau or similar
- Strong SQL/MySQL and database skills, particularly SQL/MySQL query development to extract data
- Experience of administrating cloud services within Business Intelligence tools to enable collaboration both internally and with customers
- Experience in report building in Crystal Reports, Business Objects, QlikView or similar
- Interest in data visualization best practice and finding optimal ways to support users to gain insight and make business decisions with their reporting
- Ability to gather requirements for a report direct with a customer
- Is excellent with all levels of stakeholders, building strong relationships with customers, leading, and presenting communications, as well as facilitating conversations
- Is technically savvy with a strong understanding of software complexities
- Thinks analytically and thrives with problem solving
- Clearly, effectively, and confidently communicates to C-suite stakeholders
- A high level of attention to detail.

Exposure to the following would be desirable but not essential:

- ETL experience
- Data Warehouse experience
- Domain knowledge of Six Sigma, Hoshin Kanri, Balanced Scorecard or strategy execution.

As part of your day-to-day activity, you will:

- Manage the full lifecycle of BI engagement (design, implementation, test and ongoing support) of report and analytics packages to agreed requirements
- Design, development and administration of internal reporting packages in Power BI
- Working with customer representatives to analyse and document customer-specific reporting, analytics and integration requirements
- Second-line support responsibility for customer support tickets relating to reporting or integration
- Support in the creation of integration packages enabling our customers to import, export and transform their data easily and quickly
- Support project management activities, including creating and updating project plans and timelines
- Work against your Data and Insights KPIs, including achievement, response time, time to value, and customer satisfaction
- Continually learn and develop your knowledge of i-nexus, demonstrating credibility to successfully deploy reporting solutions to customers
- Works cross-functionally with all i-nexus departments to improve our standard reporting offerings within the product.

We will support you as you become a highly valued member of our team and pay a competitive starting salary depending upon your experience, skill level and aptitude.

Please send your CV to [Avi Joshi](#), Head of Success.

About i-nexus

i-nexus provides cloud strategy execution software to leading global brands aspiring to excel at strategy execution. Its scalable, enterprise grade platform is deployed within multiple global blue-chip businesses, predominantly based across the US and Europe.

By digitalizing how companies manage the strategic planning process, from developing robust strategic plans to overseeing their delivery and measuring results for data-driven decision making, i-nexus customers achieve breakthrough performance by delivering more strategic goals at pace.

From transformational initiatives across entire organizations to business unit-specific programs, i-nexus strategy execution software is the choice of leaders tasked with aligning people and results to business-critical goals.
